

Understanding Malpractice Coverage for Botox® and Dermal Fillers

If your state board allows you to perform Botox® and/or dermal filler injections for dental health-related treatments, it's important to have the right malpractice protections in place.

MedPro Group — the nation's leading dental malpractice insurer — offers dentists comprehensive malpractice coverage based on your reported scope of practice. All procedures you perform including Botox® and/or dermal filler injections must be reported to ensure they are not excluded from your policy.

Contact Jerri Wildhaber at MDIS today to ensure your coverage reflects your scope of practice and get the full protection you need.
